

Front-End Projects

By- Shobhika

Personal Portfolio and Gamer Portfolio

Used HTML,CSS and Javascript to make two working portfolio websites so that one could easily his/her work to customers or other people.

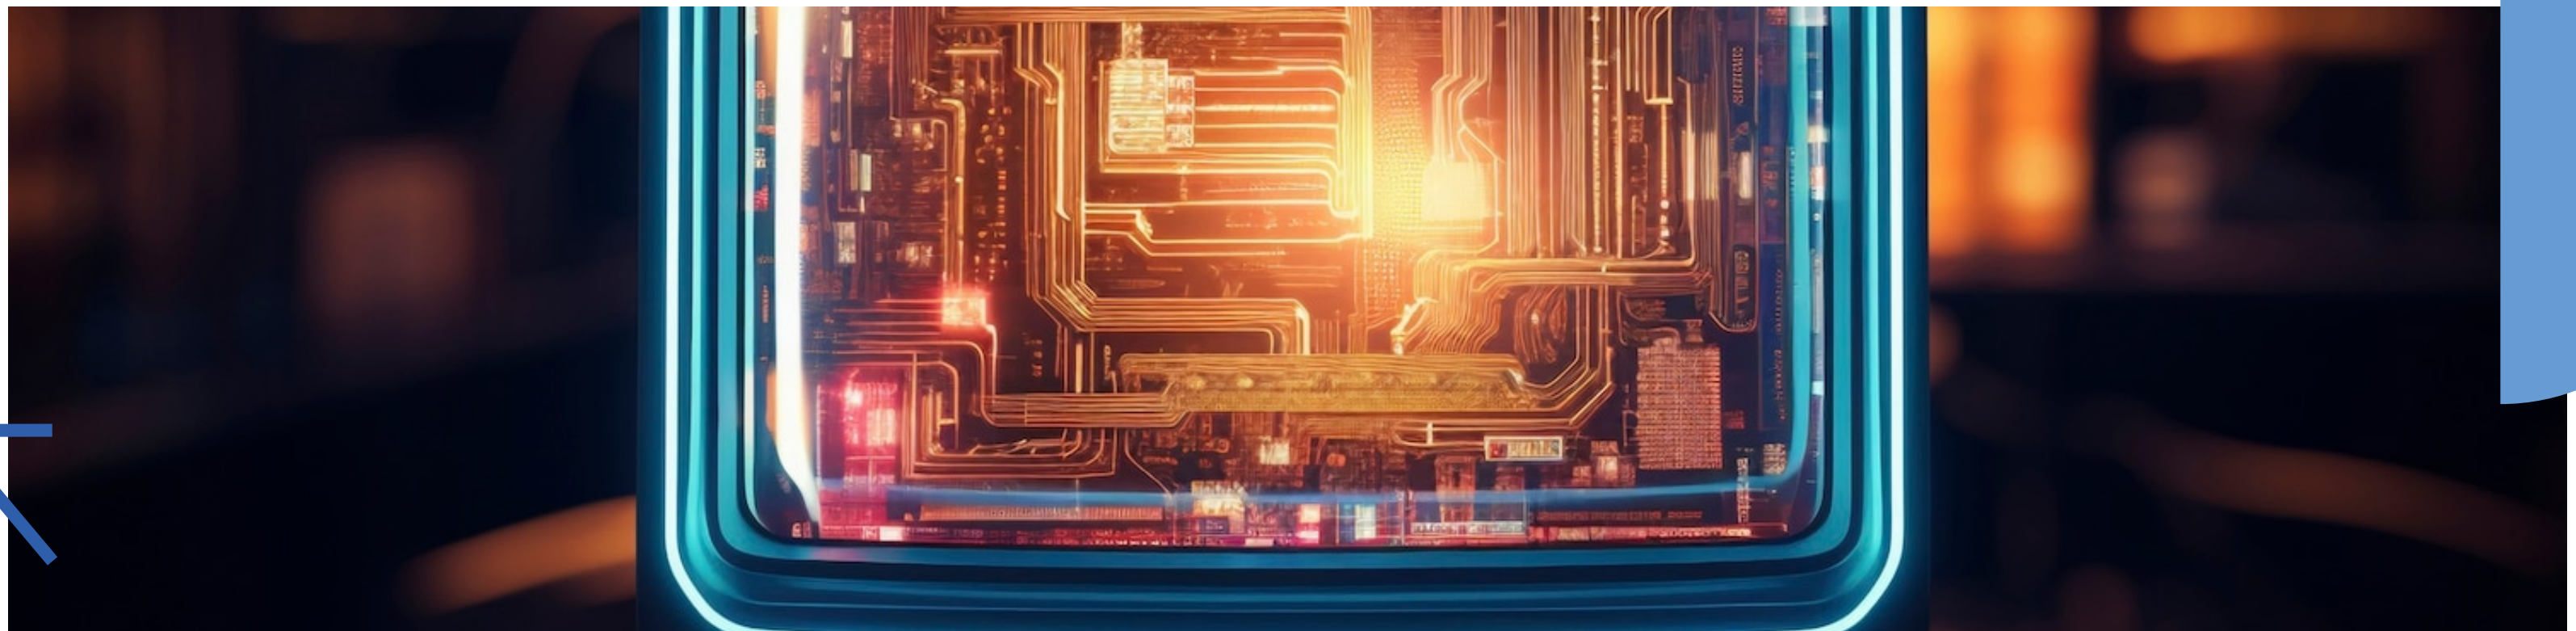

Tools for Seamless Development

HTML

CSS

JAVASCRIPT

Conclusion and Best Practices

Now I am capable of making a front-end website very easily and within much less time. The introduction to other technologies has also helped me a lot now I will be trying to create the full stack web development projects.
